

# **exocet** **CRANKCASE FLUSH** (X01077A)

managing fuel quality

## **DESCRIPTION**

Exocet® Crankcase Flush is a formulated chemical additive for use by professional garages designed to ensure optimum crankcase cleaning and to facilitate lube oil draining prior to an oil change.

## **APPLICATION**

Exocet® Crankcase Flush should be added to a warm engine sump via the oil filler cap and the engine run at idle speed for up to 5 minutes. Used lube oil should then be drained in the usual way.

## **BENEFITS**

## **FEATURES**

- ◆ Contains concentrated hydrocarbon dispersant
- ◆ Mineral oil carrier fluid compatible with engine materials and seals

## **WHEN TO USE**

- ◆ At an oil change
- ◆ Mineral oil carrier fluid compatible with engine materials and seals

## **TREATMENT RATIO**

1 litre of product treats 30 litres of lube oil

All Exocet® branded products are available in a range of sizes to 1,000 litres
