

# exocet MOTORMATE (XO1983P)

## DESCRIPTION

Exocet MotorMate has been specially formulated to enhance and protect petrol and petrol fuel systems where fuel is stored for long periods of time and/or the associated equipment is used only infrequently and when ethanol-containing fuel may be an issue. The product acts to upgrade the critical characteristics of the fuel and to delay the symptoms of fuel ageing. Additionally, it has anti-corrosion and biocidal properties.

## APPLICATION

Exocet MotorMate is intended for use in small storage tanks or directly in the vehicle/machinery fuel tank.

The use of Exocet MotorMate ensures that any concerns over fuel quality are eliminated and that even branded fuel is top-treated to achieve much enhanced performance.

Stored fuel often discolours, forms gums and other deposits and results in a deterioration in the ignition quality. Fuel ageing is irreversible and is accelerated by the addition of bio-components (e.g. ethanol) to the extent that latest specification fuels may only have a shelf life of 6-8 months.

## FEATURES

- Cleans up and keeps clean fuel injectors and carburettors
- Improves 'control-ability' and throttle response
- Increases fuel economy
- Contains an octane booster to reduce 'pinking' potential
- Controls combustion chamber deposit build-up
- Reduces unwanted emissions
- Protects against ethanol-based corrosion
- Contains a high dose of antioxidant (anti-ageing) component
- Delays discolouration, gum/solids formation
- Maintains the fuel's ignition quality
- Reduces the potential for microbial growth during downtime
- Has corrosion inhibition properties
- Reduces the potential for filter plugging

## BENEFITS

## WHEN TO USE

- Better throttle control/driveability is required
- Require compatibility with bio-components (ethanol)
- Desire optimum engine cleanliness

## TREATMENT RATIO

200ml of additive treats 15 litres of fuel

All Exocet® branded products are available in a range of sizes to 1,000 litres
