

NEW PRODUCT LAUNCH

OFF ROAD DIESEL SUPREME

exocet® Off Road Diesel Supreme protects engines from the problems associated with biodiesel and is designed specifically for use for off road vehicles.

FUEL LEGISLATION CHANGES 1ST APRIL 2022

Sectors and applications that are no longer able to use red diesel from 1st April 2022 include construction, mining and quarrying, ports, manufacturing, haulage (for transport refrigeration units on lorries), road maintenance, airport operations, plant hire, logistics and waste management.

It would be easy to conclude that the requirement to enhance fuel by using fuel additives is no longer necessary.

However, it is very important to remember that biodiesel is used in all diesel with many unintended consequences for engine performance and maintenance

DETAILED DESCRIPTION:

exocet® Off Road Diesel Supreme is an advanced fuel additive designed to benefit both mineral diesel and biodiesel blends. It prevents deposit formation throughout the fuel delivery system, especially in the injectors and fuel pump, to keep the system clean and running at optimum performance.

It also compensates for some of the deleterious effects of a higher FAME content (e.g. tendency for water pickup) and will prevent the agglomeration of biodiesel precipitates that can be the cause of filter blocking which results in fuel starvation in the engine.

EXOCET® OFF ROAD DIESEL SUPREME BENEFITS ARE:

- Prevents agglomeration of biodiesel precipitates that cause filter blocking
- Maintains injector and fuel system cleanliness and prevents corrosion
- Increases cetane
- Reduces emissions
- Gives fuel economy benefit

APPLICATION

The additive will counter any negative effects resulting from the introduction of the latest diesel specifications, the allowable FAME (biodiesel) content and will avoid increases in fuel consumption due to sticking injectors and wear.

Typical applications are construction equipment, airport vehicles and fork lift trucks.

The product is formulated from recognised fuel additive components and should not void an engine manufacturer's warranty. In fact, many engine manufacturers now recommend the use of upgrade additives.

PRODUCT LAUNCH COMING SOON

EXOCET® DIESEL DEFENDER ANTI-THEFT MARKER DYE

FAST anticipate the launch of exocet Diesel Defender Anti-Theft Marker Dye which is currently going through compliance checks directed by HMRC. We aim to have a marker dye that will not interfere with any other fiscal dyes or markers currently in use.

If dyes or markers are used that do cause an interference or have similarity with any current fiscal dyes and markers, the end user could be prosecuted by law enforcement agencies because it will be detected as rebated fuel.
