

ETHA-PROTECT (X01987P)

DESCRIPTION

Exocet® Etha-Protect has been specially formulated to enhance and protect petrol and petrol fuel systems where fuel is stored for long periods of time and/or the associated equipment is used only infrequently and when ethanol-containing fuel may be an issue. The product acts to upgrade the critical characteristics of the fuel and to delay the symptoms of fuel ageing. Additionally, it has anti-corrosion properties.

APPLICATION

Exocet® Etha-Protect is intended for use in small storage tanks or directly in the vehicle/machinery fuel tank.

The use of Exocet® Etha-Protect ensures that any concerns over fuel quality are eliminated and that even branded fuel is top-treated to achieve much enhanced performance.

Stored fuel often discolours, forms gums and other deposits and results in a deterioration in the ignition quality. Fuel ageing is irreversible and is accelerated by the addition of bio-components (e.g. bio ethanol) to the extent that latest specification fuels may only have a shelf life of 6-8 months.

WHEN TO USE

- ◆ Better throttle control/driveability is required
- ◆ Require compatibility with bio-components (ethanol)
- ◆ Desire optimum engine cleanliness
- ◆ Slow fuel use and storage

FEATURES

- ◆ Improves fuel shelf life
- ◆ Cleans up and keeps clean fuel injectors and carburettors
- ◆ Improves throttle response
- ◆ Increases fuel economy
- ◆ Controls combustion chamber deposit build-up
- ◆ Reduces unwanted emissions
- ◆ Protects against ethanol-based corrosion
- ◆ Contains a high dose of antioxidant (anti-ageing) component
- ◆ Delays discolouration, gum/solids formation
- ◆ Maintains the fuel's ignition quality
- ◆ Has corrosion inhibition properties

BENEFITS

TREATMENT RATIO

50ml of additive treats 50 litres of fuel

All Exocet® branded products are available in a range of sizes to 1,000 litres
